

{CATÁLOGO}

VÁLVULAS DIRECIONAIS

A **Bel Air Pneumática & Hidráulica** leva a você a aliança perfeita entre qualidade, atendimento e preço. A tecnologia de vanguarda de uma completa linha de cilindros, válvulas e componentes pneumáticos e hidráulicos une-se ao maior **diferencial** da Bel Air: **o pronto atendimento na reposição**. No mercado desde 1996, a Bel Air está presente em todo território nacional atendendo clientes dos mais diversos setores com eficácia de processos garantida através da normativa ISO 9001.

Este catálogo foi desenvolvido para apresentação das linhas para automação pneumática fornecidas pela Bel Air e para consulta das principais características das mesmas. Em caso de dúvidas ou necessidade de material não apresentado, aqui fique à vontade para entrar em contato direto com nosso setor comercial. Esse está à disposição para lhe auxiliar.

Todos os produtos Bel Air estão cobertos por garantia e assistência técnica, mas, para que você faça uso deste direito, é necessário o cumprimento adequado de todas as exigências técnicas de implantação e de utilização do equipamento. Para sua segurança, não permita a violação dos equipamentos por pessoas não autorizadas. Solicite a assistência Bel Air.

MICRO VÁLVULAS - SÉRIE 9000 - M5

CARACTERÍSTICAS TÉCNICAS

Pressão	Máxima de 10,5 kgf/cm ² (150 psi)
Temperatura	-10°C a 80°C
Fluído	Ar comprimido filtrado e lubrificado
Construção	Poppet
Vazão	0,12 m ³ /min (obtida a 7 kgf/cm ²)

MATERIAIS

Corpo	Alumínio injetado
Molas	Aço Inox
vedações	Buna-N
Pino	Latão

CODIFICAÇÃO

KIT DE REPARO

DIMENSIONAL

1. Botão / Mola

2. Botão Interno / Mola

Disponível nas cores vermelha, verde e preta.

3. Botão Cogumelo

Obs: Modelo **retorno mola** disponível nas cores vermelha, verde e preta.

Modelo **retorno trava** disponível somente em vermelho. É necessário girar o botão para o destravamento do mesmo.

4. Gatilho / Mola

5. Pino / Mola

6. Rolete / Mola

7. Alavanca plástica / Trava

8. Seletor Longo / Trava

9. Pedal Dois Estágios

A. Alavanca Metálica / Trava

C. Seletor Curto / Trava

Furação para painel

Considerar medida para os modelos: botão interno, botão cogumelo, alavanca plástica, seletor longo e seletor curto.

VÁLVULAS DIRECIONAIS - SÉRIE 8000 - 1/8"

CARACTERÍSTICAS TÉCNICAS

Pressão	Máxima de 10,5 kgf/cm ² (150 psi)
Temperatura	-10°C a 80°C
Fluído	Ar comprimido filtrado e lubrificado
Construção	Tipo <i>Spool</i>
Vazão	0,56 m ³ /min (obtida a 7 kgf/cm ²)

MATERIAIS

Corpo	Alumínio injetado
Carretel	Zamak injetado
Êmbolo	Alumínio com Anodização Dura
Vedações	Buna-N

CODIFICAÇÃO

* Utilizar referência de tensão somente quando atuador for solenóide.

** As válvulas Centro Fechado (CF), Centro Aberto Negativo (CAN) e Centro Aberto Positivo (CAP) são 3 posições.

Obs.: Para válvula com atuador Solenóide e retorno mola, o retorno será substituído para diferencial de área.

VÁLVULAS DIRECIONAIS - SÉRIE 7000 - 1/4"

CARACTERÍSTICAS TÉCNICAS

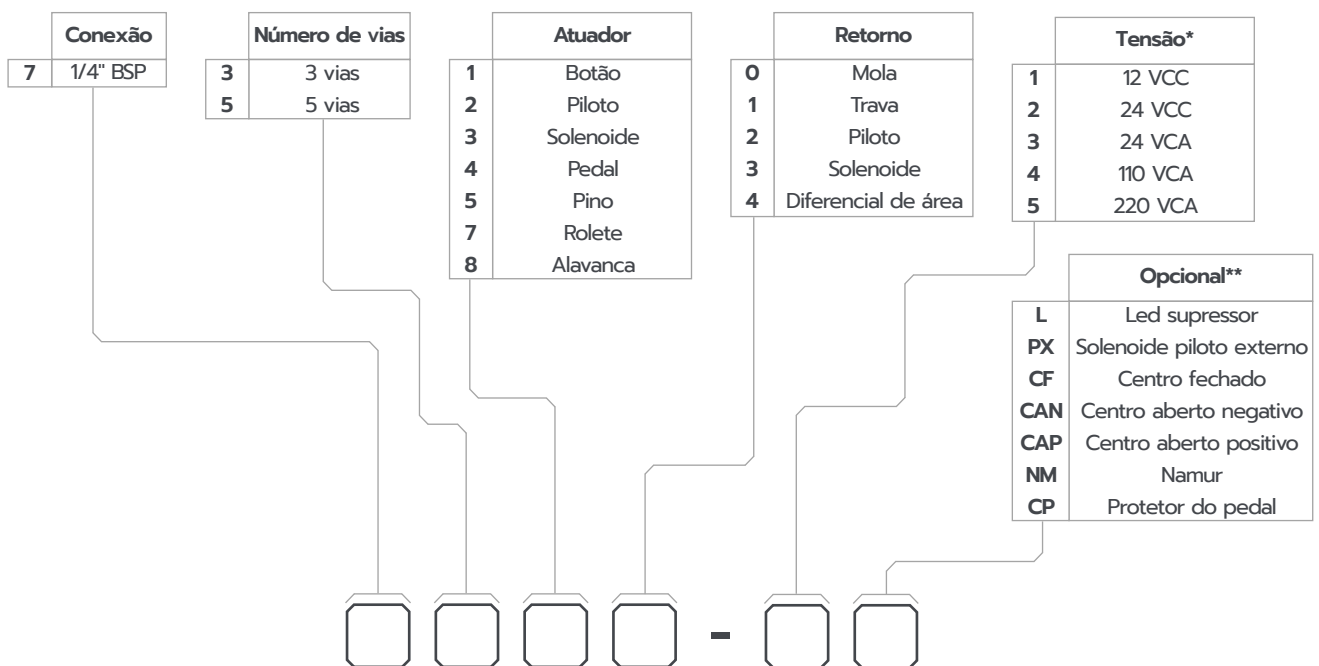

Pressão	Máxima de 10,5 kgf/cm ² (150 psi)
Temperatura	-10°C a 80°C
Fluído	Ar comprimido filtrado e lubrificado
Construção	Tipo <i>Spool</i>
Vazão	1,56 m ³ /min (obtida a 7 kgf/cm ²)

MATERIAIS

Corpo	Alumínio injetado
Carretel	Zamak injetado
Êmbolo	Alumínio com Anodização Dura
Vedações	Buna-N

CODIFICAÇÃO

* Utilizar referência de tensão somente quando atuador for solenoide.

** As válvulas centro fechado (CF), centro aberto negativo (CAN) e centro aberto positivo (CAP) são 3 posições.

Obs.: A válvula alavanca "7580-CF" é autocentrante (3 posições).

KIT DE REPARO

SÉRIE 7000 - 1/4" - FREELUB

CARACTERÍSTICAS TÉCNICAS

Pressão	Máxima de 10,5 kgf/cm ² (150 psi)
Temperatura	-10°C a 80°C
Fluído	Ar comprimido filtrado
Vazão	1,64 m ³ /min (obtida a 7 kgf/cm ²)
Vias/posições	5 vias / 2 posições

MATERIAIS

Corpo	Alumínio injetado
Carretel	Zamak injetado
Êmbolo	Alumínio com Anodização Dura
Vedações	Poliuretano - PU

As válvulas da linha Freelub oferecem a possibilidade de trabalho sem lubrificação devido a tecnologia das vedações. Importante observar que, uma vez que entrarem em contato com óleo, a característica da vedação é alterada e a lubrificação se torna necessária.

CODIFICAÇÃO

* Válvula de três vias, para linha Freelub, é fornecida no mesmo corpo 5 vias porém com 2 tampões.

** Utilizar referência de tensão somente quando atuador for solenoide.

CARACTERÍSTICAS TÉCNICAS

Pressão	Máxima de 10,5 kgf/cm ² (150 psi)
Temperatura	-10°C a 80°C
Fluído	Ar comprimido filtrado e lubrificado
Vazão	1,82 m ³ /min (obtida a 7 kgf/cm ²)
Construção	Tipo <i>Spool</i>

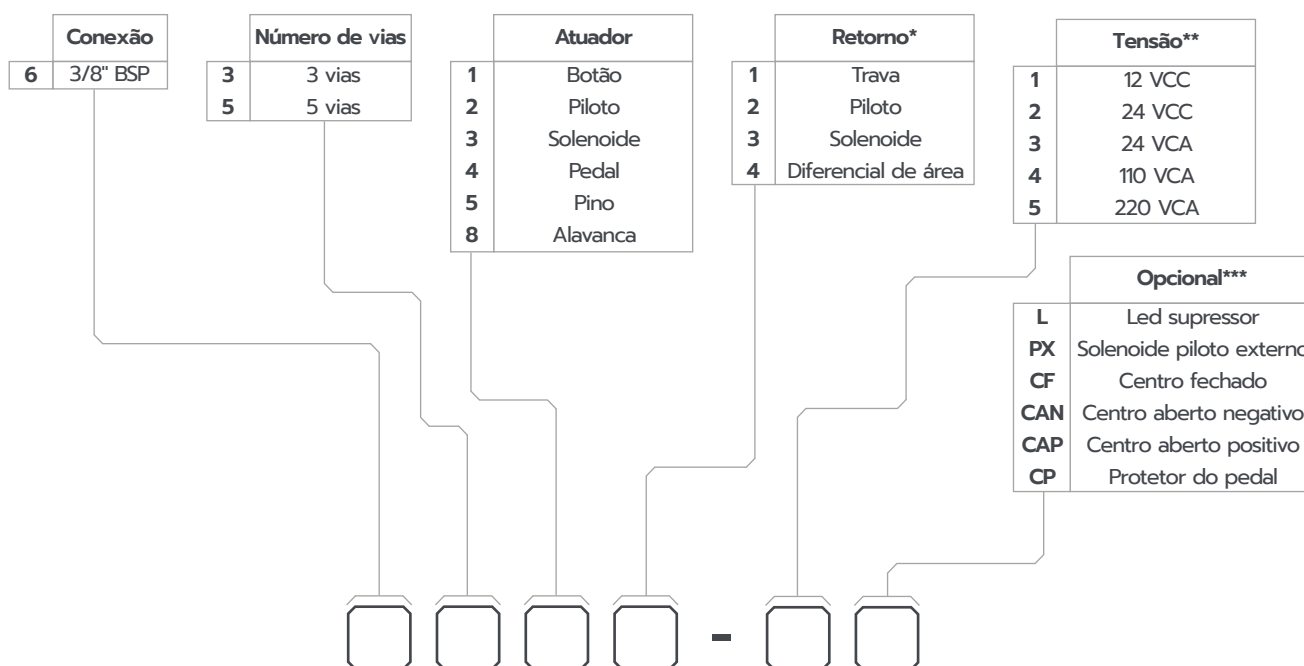

MATERIAIS

Corpo	Alumínio
Carretel	Alumínio
Êmbolo	Alumínio com Anodização Dura
Vedações	Buna-N

CODIFICAÇÃO

* Para casos onde se deseja retorno por mola, devido ao tamanho da válvula, o retorno é substituído por diferencial de área.

** Utilizar referência de tensão somente quando atuador for solenóide.

*** As válvulas centro fechado (CF), centro aberto negativo (CAN) e centro aberto positivo (CAP) são 3 posições.

BLOCO MANIFOLD BSM

CARACTERÍSTICAS TÉCNICAS

Pressão	Máxima de 10,5 kgf/cm ² (150 psi)
Temperatura	-10°C a 80°C
Fluido	Ar comprimido filtrado e lubrificado
Construção	Válvula de acionamento direto

Bloco manifold para conjunto solenoide de bobina mini (5 W), grande (8 W) e maxi (17 W) de 2 ou 3 vias com rosca 1/8" ou 1/4" BSP.

CODIFICAÇÃO

DIMENSIONAL

* Quantidade máxima de válvulas por bloco é 15.

** Para válvulas com bobina mini (4,8 W), disponível somente orifício Ø 1,5 mm.

*** Nos blocos com bobina grande, observar a tabela de pressão máxima de trabalho em função do orifício utilizado (tabela p. 103).
